

Your Government Wants Your Help To Stop the Spread of Robocalls!

Act Now - It's The Law!

By June 2021, law requires every service providers to implement robocall mitigation within their VoIP network to protect subscribers from disruptive, unwanted, and fraudulent phone call solicitation by telemarketers and nefarious spammers. (TRACED Act 2019)

Stop the tens of billions (over 54 Billion in 2019) of robocalls that occur each year in the USA alone.

Cloud-Based Robocall Mitigation

Protect your customers from robocalls, caller ID spoofers, and call scammers with our cloud-based service. We give you the scoop on every call.

We send you a fraud score for every call you receive:

- >> If the score is **HIGH**, we send you a prepended "Robo" to the Caller ID Name of that call
- >> If the score is **REALLY HIGH**, we'll prepend "Fraudulent Call"

Integrate Robocall mitigation into Your network today!

Our robocall mitigation service is part of our Caller ID Name (CNAM) API, enabling you to easily integrate robocall mitigation and CNAM service within your VoIP network. It is also available at no extra charge to customers using our existing CNAM services.
